

SOLENOID ACTUATED VALVES SERIES MVSE

STRÁNSKÝ A PETRŽÍK

This valve series that complement favorite MVSC series with their parameters, over which they can handle up to 1.2 MPa. Other parameters, such as power consumption and flow, are the same or similar. The MVSE series is indirectly controlled. All 5/2 with one or two coils and 5/3 with medium closed, ventilated and under pressure (5/3 not available for MVSE-500) are available. The valves can be used directly or can be mounted on a manifold.

This valve series contains rubber gaskets.

It is possible to mount series MVSE valves on manifold with predefined number of position. It isn't possible to add another position to created assembly - it could be necessary to replace manifold or create another manifold. If there is possibility that more valves will be needed in future, we recommend to use manifold with more positions and use blocking plates for unused positions. Valves are mounted to manifold directly - no adaptor is necessary. Valves mounted on manifold could be unmounted separately by unscrew of 2 bolts, which are accessible from top side (side with ports 2 and 4 of valves). Each separate coil must be wired with separate electrical cable.
