

HIGH FLOW PNEUMATICALLY ACTUATED VALVES

STRÁNSKÝ A PETRŽÍK

High flow valve series with flow capacity up to 28 000 NI/min is suitable for fast air supply of big appliances, or higher quantity of appliances which are supplied from common distribution. Valves are pilot operated, using smaller, standard pneumatic actuated valves ISO 5599/1. These pilot valves are designed for external supply of compressed air, however the common supply is possible, but in this case, please contact our technical dept.

This valve series contains rubber gaskets.

Notes for connecting of valve

Valves are designed for independent, external air pilot supply (port X). It is not recommended, to merge air supply for main valve and for pilot valve, because a big flow through main valve may cause serious dropping of pressure for pilot valve and malfunction may occur.
